Eastern Shore Solar

EVERY HOME- OWNER SHOULD KNOW ...

Electricity costs on the Eastern Shore have grown by up to 50% in the last two years.

There is a cost effective solution that can put up to \$20,000 in your pockets over the next 20 years.

SOLAR HOT WATER

The combined effects of the state benefits and the Federal tax credits reduce the cost of a typical residential solar hot water system by almost 50%.

- If you are building a new house, you will have additional savings by not having to purchase and install a traditional hot water heater.
- The portion of your hot water that comes from the sun comes without a fuel bill for the life of the system.
- Recent reports indicate that going solar can improve the resale value of your home.

Solar's TIME IS NOW!

DID YOU KNOW?...

• a recent Roper Poll (June, 2006) found that **79%** of Americans believe homebuilders should offer Solar options on new homes?

We all love and need the sun, and it can provide up to 75% of your family's home hot water needs.

• that solar improvements to homes add nearly **50%** of their cost to the resale value of the home?

• that **64%** of homebuyers would be willing to pay more for a home with a solar system?

• that **73%** felt that Solar Energy Technology is more important today than ever?

• hot water is the number two energy consumer in your home. **Hot water can be 30% of a family's energy bill each month!**

• that **42%** of homeowners said that saving money on monthly utility bills is the most compelling reason to install solar alternatives?

In addition, DID YOU KNOW?...

• the federal government currently offers homeowners a **30% tax credit** (up to \$2000) for the installation of domestic solar systems both on retrofits and on new construction!

• that the State of Maryland offers an additional **20% state grant**, up to \$2000 to homeowners installing solar systems?

• that the Maryland **payback** time for a typical Solar hot water system is **less than 5 years!**

• a home system installed in Maryland can earn the homeowner nearly **\$20,000** over its **20 year** life!

Are you ready to Go Solar?

- Our **Solar H₂O**t Water systems are made from the **best quality materials** on the market today
- Our systems have very good cost/performance
